

Holistic risk assessment in the era of climate change

Evaluation Workshop on two value chains

Context

Explore the holistic risk assessment of the lentil and poultry value chains developed in HOLiFOOD. Microbiological, chemical, nutritional, economic, and environmental risks were analysed for the present day and for 2050 under climate change scenarios.

Join the workshop session to evaluate the co-designed assessment and share feedback with researchers and practitioners.

When

June 9, 2026
14:30 – 18:00 CET

Where

Wageningen Campus - Vitae (building 123)
